1. Introduction

1.1. Document Writing Purpose

This QnAI web user manual document was created for the following purposes:

1. Describe and explain the use of the QnAI web-based application for Users
2. As a guide to using this QnAI web-based application

1.2. App General Description

This application will be a web-based application and this app will belong to Artificial Intelligence of Telkom University and AI enthusiasts. It is designed to be a forum that will be used for AI Lab and AI enthusiasts to share information about AI tech. We hope this app will help students in the AI lab of Telkom university find resources, study cases, datasets and information about Artificial intelligence. The complete information about the app will be in 2 Overall descriptions.

1.3. General Description of Application Requirements

General description of application requirements to be implemented includes all technical information that becomes in application development.

1.5. General Description of Documents

This document was created to provide guidance on using the QnAI web-based application. This document contains the following information:

1. CHAPTER I. Contains general information which is the purpose of the introduction, which includes document creation, general description of the system, and document description.
2. CHAPTER II Contains the tools needed for QnAI web-based application use including software and hardware
3. CHAPTER III Contains the QnAI web-based application user manual, both user manuals intended for administrators and users

2. Required device

2.1. Hardware Design

Hardware used :

1. Computer (monitor, keyboard, mouse)
2. Smartphone

2.2. Software Design

Software Used :

1. Windows, Ios, Android as Operating System
2. Chrome, Mozilla Firefox, Safari as Browser

2.3. App Users

Application users who will use the application are as follows:

1. Have an understanding of computer interfaces
2. Have an understanding of application business processes.

2.4. Introduction and Training

Human resources involved in the day-to-day operations of using this application are given sufficient introduction and training first.

3. User Interface Design

In this section, we will explain about the menus on the website and the procedures for using the website

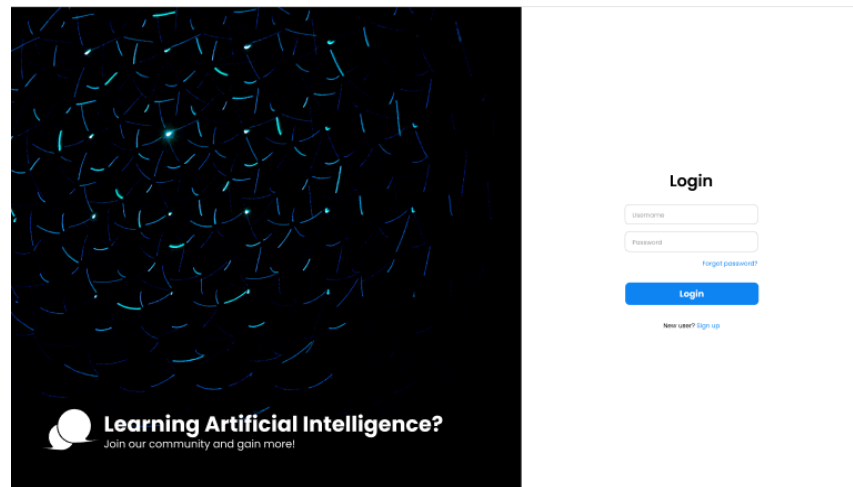

3.1. How to Open the Site

To start accessing this QnAI web

1. Open the QnAI application via a web browser (IE or Mozilla FireFox or others).

2. Then press Enter on the keyboard key or click the Go button on the browser.
3. The front page of the QnAI application will appear.

Then the screen will show QnAI login page like in figure 3.1.

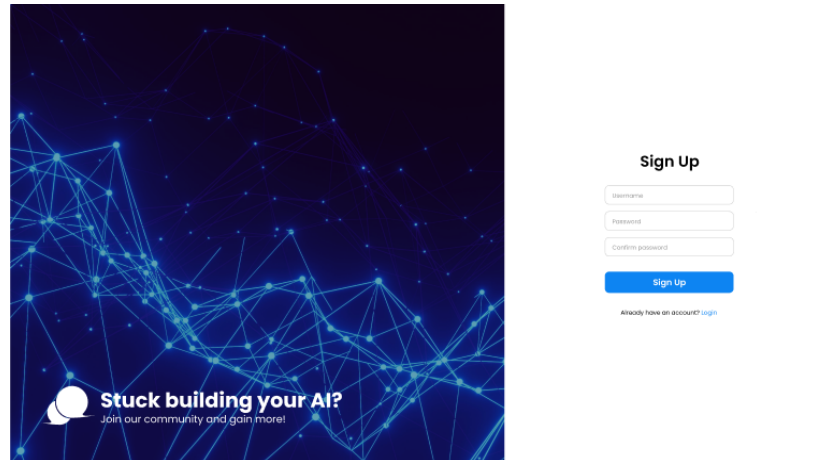

Picture 3.1

3.2. Login or SignUp

If the user already has an account, the user can directly log in using the account that was previously registered and if the user does not have an account to login, we provide a sign-up feature for new users to access this application

1. If you already have an account, please enter your username and password and then click the login button
2. If you don't have an account, please register by clicking on sign-up
3. Then the page will move to the sign-up page and then new users can enter some information, namely:
 - a. Username
 - b. Password
 - c. Confirm password

Picture 3.2

3.3. Home Page

Then after you are registered, you can login as instructed in section 3.2. After that you will see the home page display. On this page there are several menus such as profile, home button, leaderboard button, and notification button as shown below.

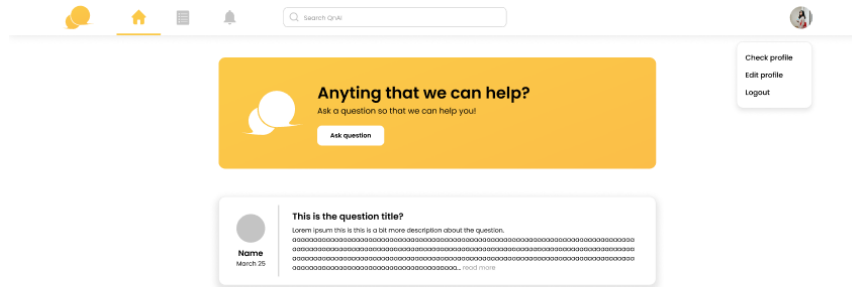

On this home page there are several features including:

1. Ask a Question

The feature to ask questions in QnAI, by clicking Ask A Question, enter a question and send it.

2. View and answer other users' questions

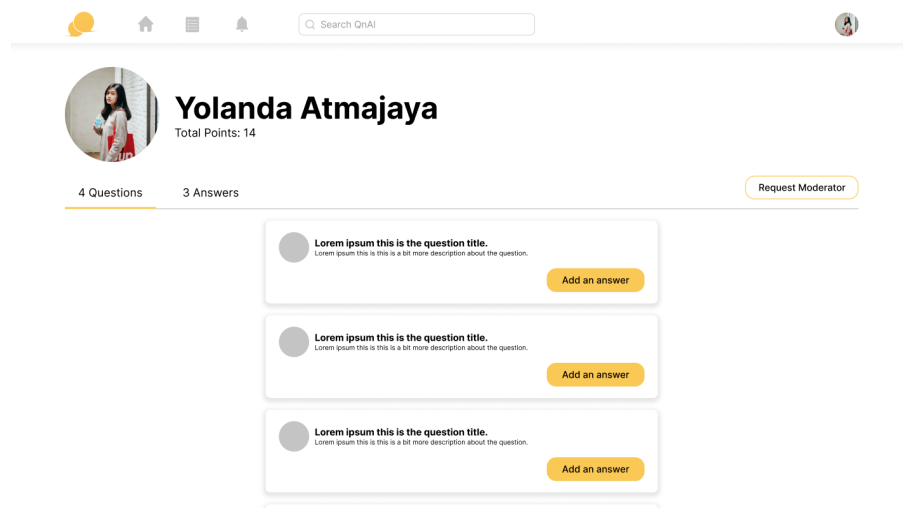

Users can answer questions from other users by clicking Add an Answer.

Picture 3.3

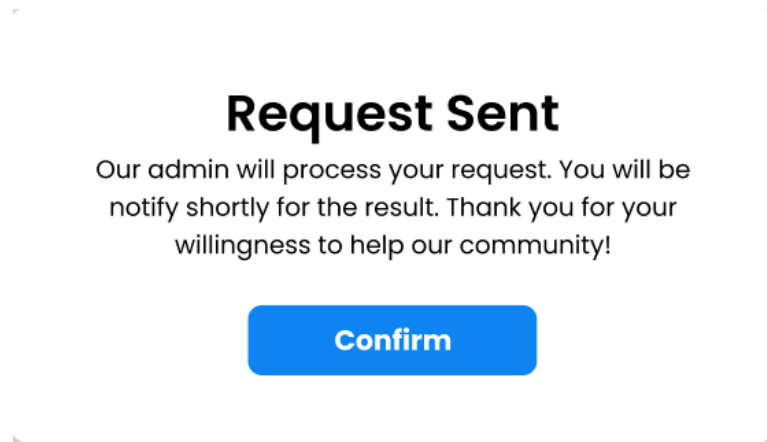

3.4. Profile

On the profile page you can see the questions or answers that you have made, but it is also possible to send requests to become a moderator. There is also the number of points you have earned. Profile page is divided into two, namely profile as a user and as a moderator. Below is an example of a user profile page.

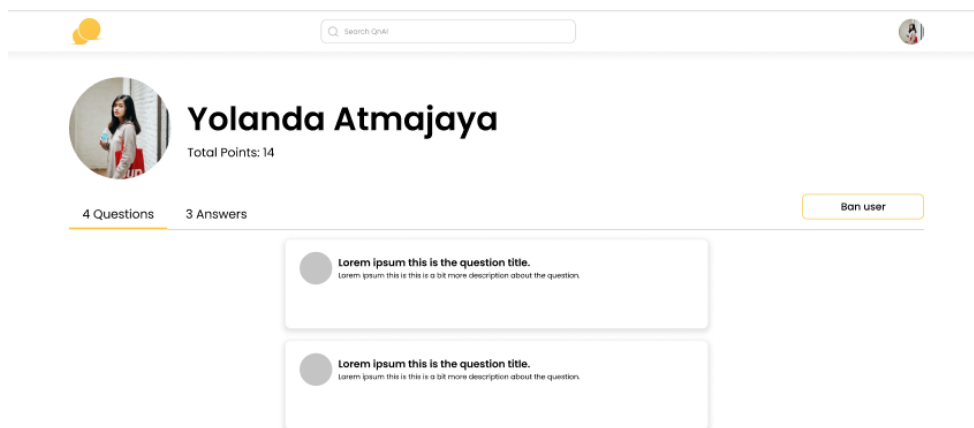

Picture 3.4

If the user requests as a moderator, a notification will appear.

Picture 3.4.1

Below is a profile page seen by an admin. They are able to ban a user..

Picture 3.4.2

difference :

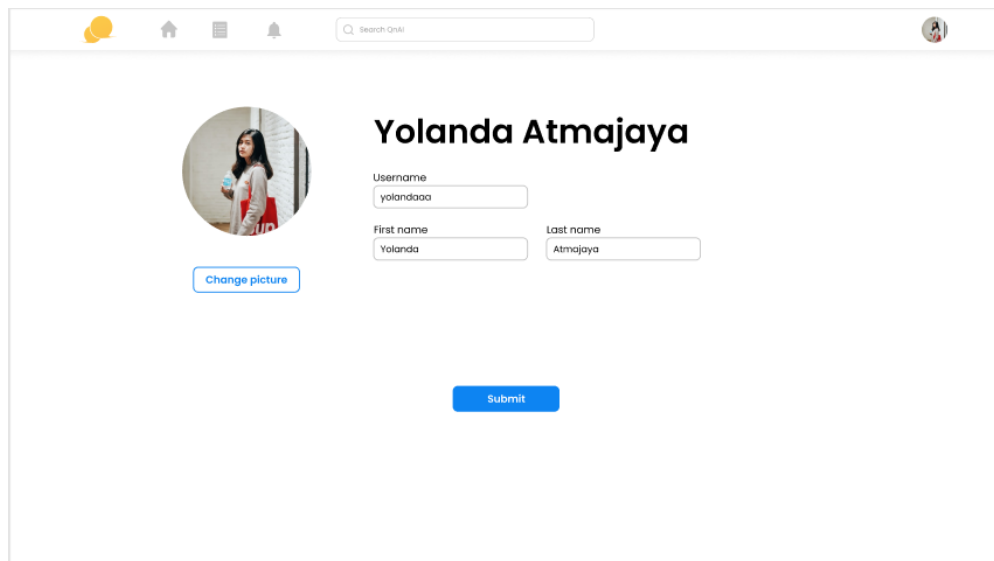

1. On the user page there is a button icon to request as a moderator
2. On the admin page there is a button icon to ban users who violate the provisions of this web app

3.5. Edit Profile

If we click on our photo on the home page, there will be three options, namely check profile, edit profile and logout. To edit the profile then we have to click on the edit profile section and the user will switch to the edit profile page. On this page the user can change

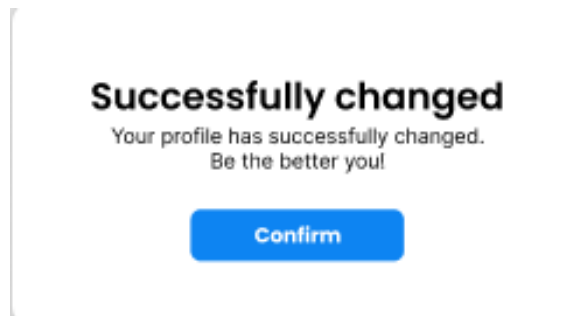

- a. Foto profile
- b. Username
- c. First name
- d. Last name

After you finish changing it you can click the submit button then your profile will be replaced. And a notification will appear successfully changed.

The screenshot shows a web interface for editing a user profile. At the top, there is a navigation bar with icons for home, menu, and notifications, along with a search bar and a user profile icon. The main content area features a circular profile picture of a woman, a 'Change picture' button, and the name 'Yolanda Atmajaya'. Below the name, there are input fields for 'Username' (containing 'yolandaaa'), 'First name' (containing 'Yolanda'), and 'Last name' (containing 'Atmajaya'). A blue 'Submit' button is positioned at the bottom of the form.

Picture 3.5.1

3.6. Profile page question and Answer

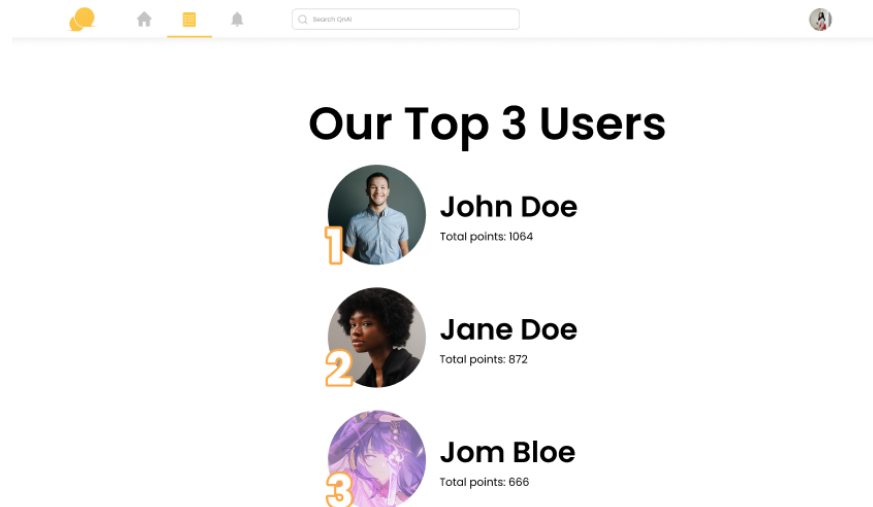

In the profile section there are two clickable icons, namely question and answer. Users can see how many questions have been asked and how many answers have been answered. If the tab is clicked, the answer and question history of the user can be seen.

Picture 3.6

3.7. **Leaderboard Page**

When you click the leaderboard icon, a display like the image below will appear.

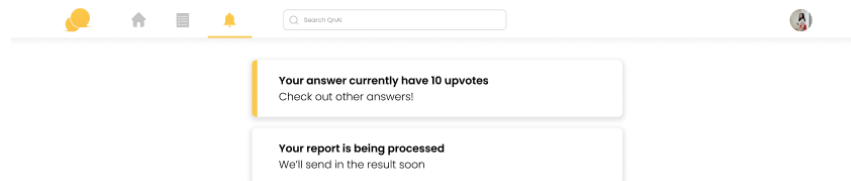

Picture 3.7

This page is useful for displaying users who are at the top regarding their points from every answer they have created.

3.8. Notification Page

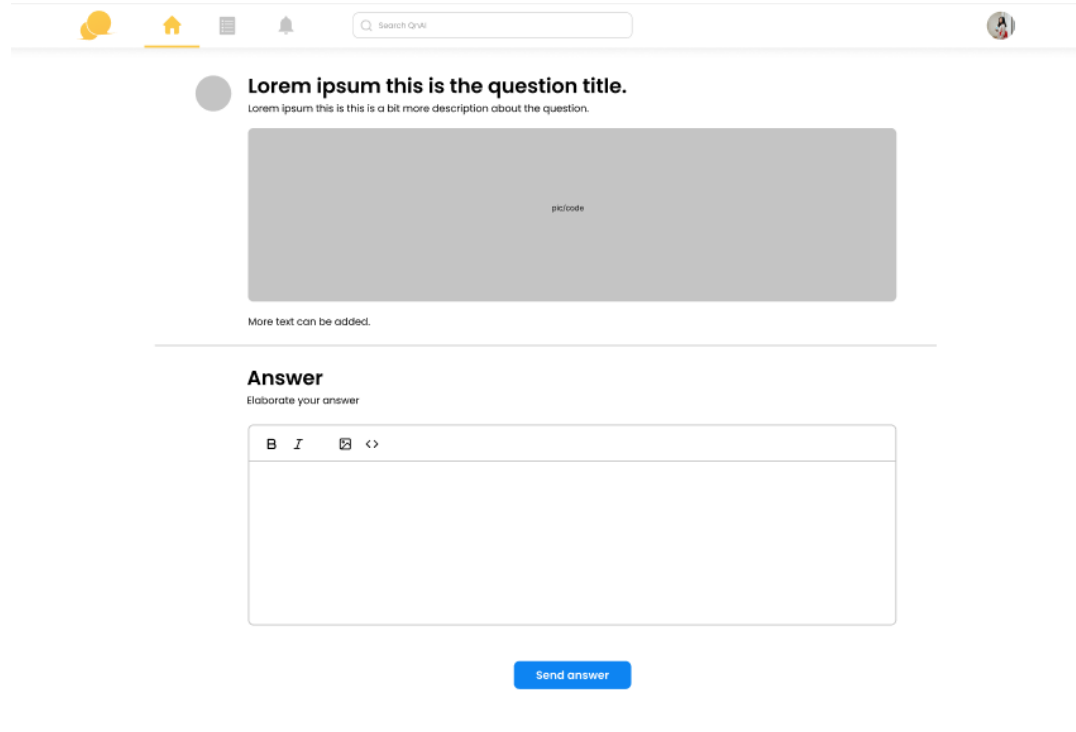

When you click the notification icon, the user can see notifications on the account, such as notifications about the answers the user made, report notifications, and others.

Picture 3.8

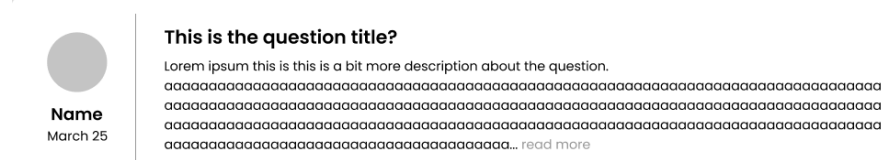

3.9. Answer Page

On this page, users can answer questions from other users, and can answer with pictures, plain text, or source code.

Picture 3.9

If the answer is successful created, it will later on displayed on the homepage like 3.9.1.

Picture 3.9.1

3.10. Question Page

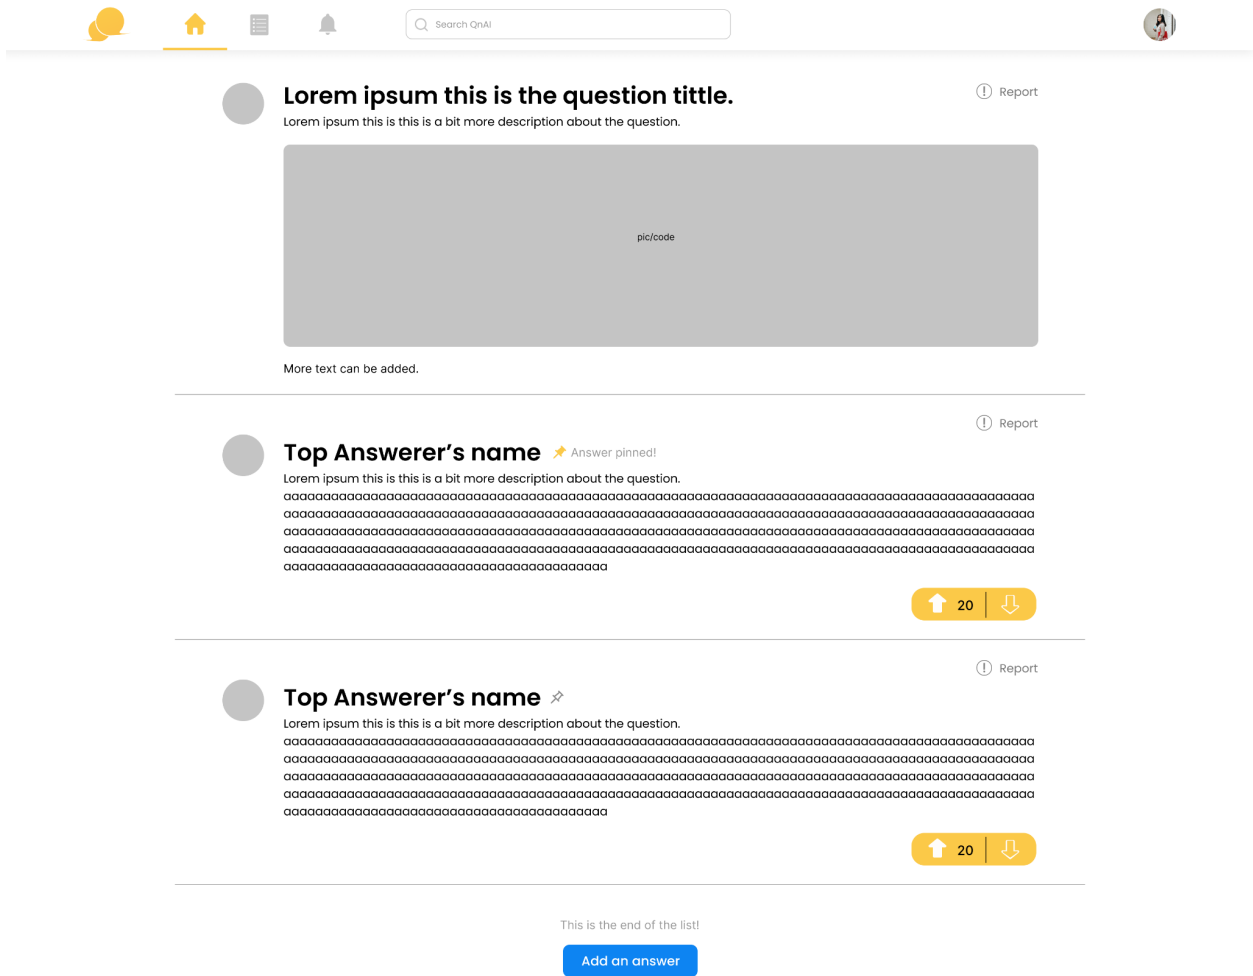

Users can send questions by starting with writing the title of the question, then the contents of the question in the column below, can be in the form of text, images, or source code.

The image shows a web interface for submitting a question. At the top, there is a navigation bar with icons for a chat bubble, a home house, a list, and a bell, followed by a search bar labeled 'Search QnAI' and a user profile icon. The main form consists of two sections: 'Title' with the instruction 'Put in your simplified question' and a single-line text input field; and 'Body' with the instruction 'Specify your question here' and a multi-line text area. The text area has a toolbar with icons for bold (B), italic (I), link (chain), and code (<>). Below the text area is a yellow button labeled 'Send question'.

Picture 3.10

3.11. Question Detail Page

In this section of the page users can report questions that are inappropriate to ask by clicking the report button and a notification will appear to provide a clear reason why users report this question.

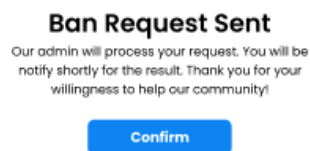

Picture 3.11.1

A notification will appear below to include the reason.

Picture 3.11.2

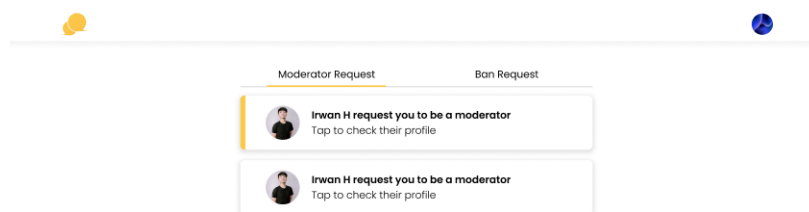

Then a notification ban request sent will appear.

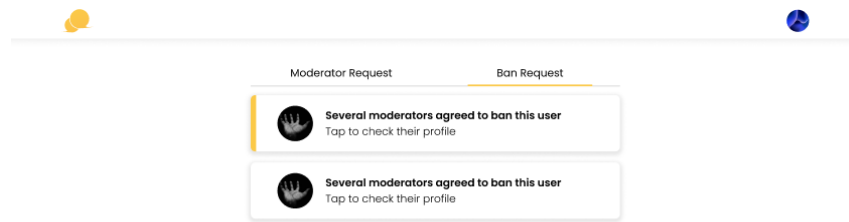

Picture 3.11.3

3.12. Admin Moderator and Ban Request Page

On this page the admin can see notifications such as Moderator Requests and Ban Requests.

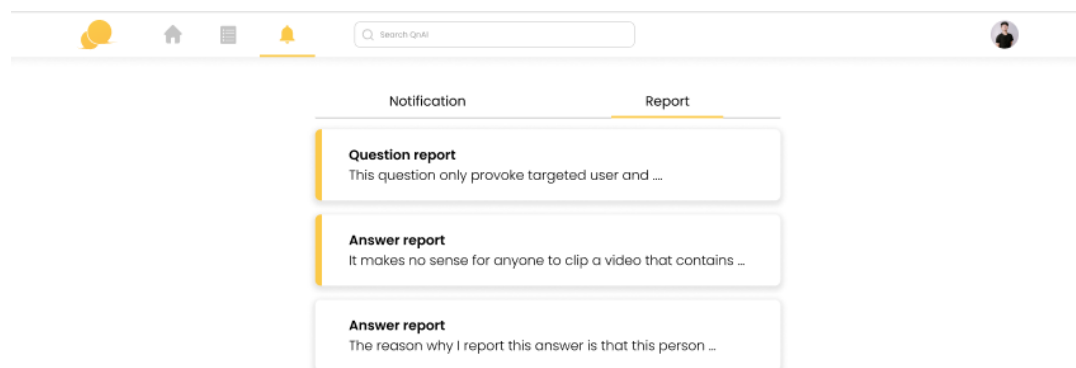

Picture 3.12

Picture 3.12.1

3.13. Report page

This page will display any reports that have been made and the moderator can see whether the report can be followed up or not, if you agree then the admin can click approve and if not then the admin can click approve.
